

Common Agricultural Policy Regionalised Impact - The Rural Development Dimension

Fact Sheet

Project Information

CAPRI-RD

Grant agreement ID: 226195

Status

Closed project

Start date

1 March 2009

End date

30 April 2013

Funded under
FP7-KBBE

Overall budget
€ 3 030 002

EU contribution
€ 2 295 855

Coordinated by
RHEINISCHE FRIEDRICH-
WILHELMS-UNIVERSITÄT BONN
 Germany

Objective

The Common Agricultural Policy Regionalised Impact – the Rural Development Dimension (CAPRI-RD) aims to develop and apply an operational, Pan-European tool including all Candidate and Potential Candidate countries to analyse the regional impacts of all policy measures under CAP Pillar I and II across a wide range of economic, social and environmental indicators, aligned with the CMEF. CAPRI-RD's core contains consistently linked economic models at the NUTS 2 level, the CAPRI model for agriculture, and a newly developed layer of regional CGEs. Given the importance of the EU's agricultural trade, CAPRI includes a global agricultural market model. The project will improve price transmission modelling inside the EU market, review the implementation of de-coupled payments, and maintain the CAPRI farm type layer. Harmonised and regularly updated databases, including regional Social Accounting Matrices, act as the models' sources. Quality management for data and results is ensured by clearly documented procedures that are partly based

data and results is ensured by clearly documented procedures that are partly based on statistical methods and sensitivity analysis. Spatial down-scaling algorithms will break down land use results to 1x1 km grid cells to facilitate the spatially explicit calculation of environmental impacts. During the project's lifetime, CAPRI-RD will be improved and expanded stepwise. This will enable an annual policy impact assessment of scenarios defined by a user board comprising major stakeholders at the European level, and allow contributions to be made to the yearly DG-AGRI outlook work. Further, yearly training sessions will develop the necessary capacity in the European Research Area to successfully apply CAPRI-RD during and after the project. A Graphical User Interface (GUI) will allow the scenarios to be defined, the model to be steered, and the results to be explained through tables, graphs and maps. Dissemination activities will include the distribution of reports, model documentation, GUI, code and data via the internet.
